Thank you for your purchase.

Please read this user's manual in its entirety before using the product.

Specialized skills and knowledge are required to properly install this product.

If you are not confident that you can complete installation on your own, we recommend hiring a specialist.

\* Note to hired installation specialists  
Make sure to return this user's manual to the owner after installation.

This user's manual contains important warnings and user notices. Please keep it in an easily accessible location inside the vehicle to facilitate reference at any time.

**△ User Notice**

- Do not install this product anywhere other than the prescribed location.
- \* SEIKOSANGYO CO., LTD. is not responsible for any accident, breakdown, malfunction or loss resulting from incorrect installation, disassembly or alteration of the product caused by failure to follow the warnings and user notices in this manual.
- Adhere the product in position on a warm day.
- Be aware that the adhesive strength immediately after adhering the product is not very strong
- \* The adhesive strength of the double-sided tape is at its strongest 24 hours after adhering the product.
- This product uses strong double-sided tape and cannot be removed. If the product is removed, the surface on which it was attached may be damaged.
- Seikosangyo Co., Ltd. takes no responsibility, and will pay no damages/compensation, for any change or irregularity in the user's vehicle resulting from product installation or usage, including malfunction, breakage, scratches, discoloration, marks or similar.
- While materials with outstanding heat-resistant and weather-resistant properties are used in this product, the product may deform or deteriorate due to conditions inside the vehicle in extreme heat or due to aging and other factors.

Based on woven nylon originally developed for use in military body armor, CORDURA® Ballistic Fabric is dense and rugged, utilizing high-tenacity nylon 6,6 filament yarns that offer enhanced tear and abrasion resistance.

(2) Pass the product through the heater cable so that the CORDURA® name tag on the side with the stitching (upper side) of the product ends up on the upper right.

\* Make sure to avoid forcibly pulling the product while working.

Insert the lower side of the product into the groove as shown in Figure 2.

(3) Align the Wrangler (JL) and (JK) with the joint positions on the left and right, respectively, before installing this product. Attach the product to align along the edge on the upper side where the weather strip has been removed while peeling off the (white) release paper. (Figure 2)

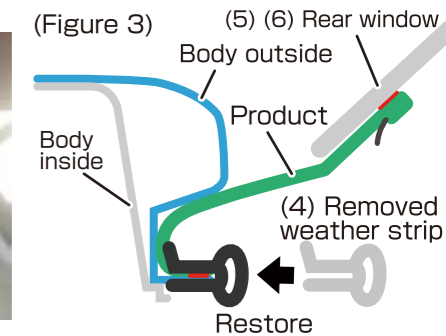

For the Wrangler (JL) model, align the edge of the product with the position indicated by the blue arrow →.

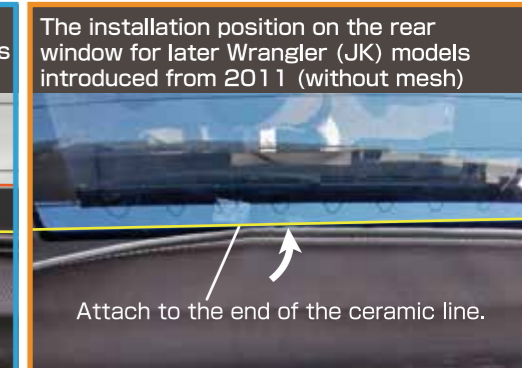

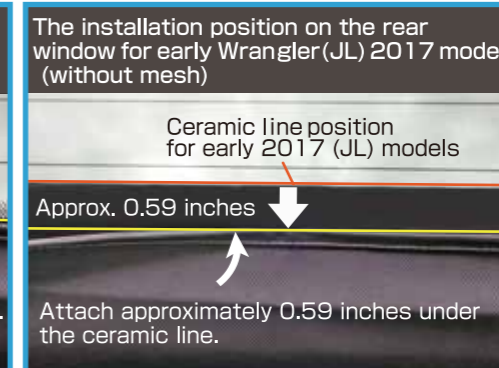

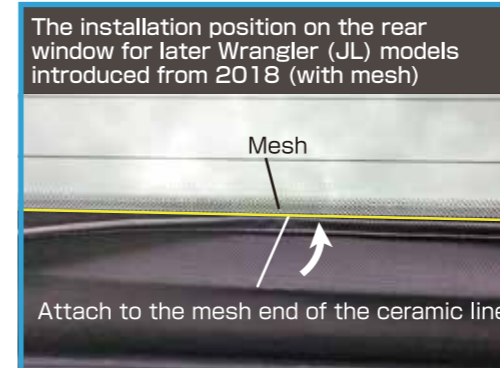

or the Wrangler (JK) model, align the ▲ marks of the product with the position indicated by the Green arrow →.

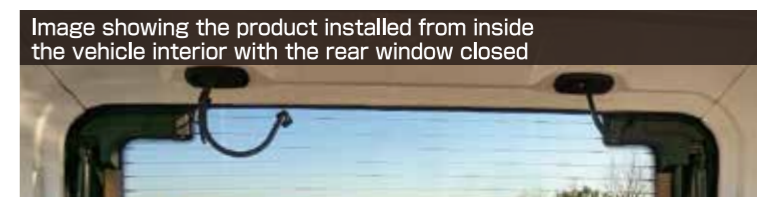

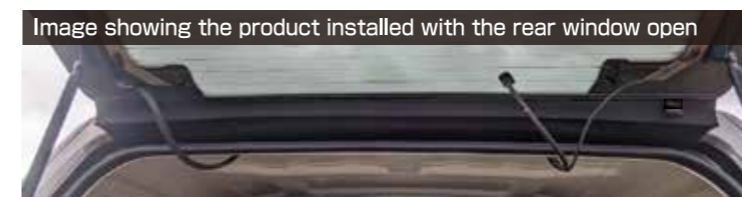

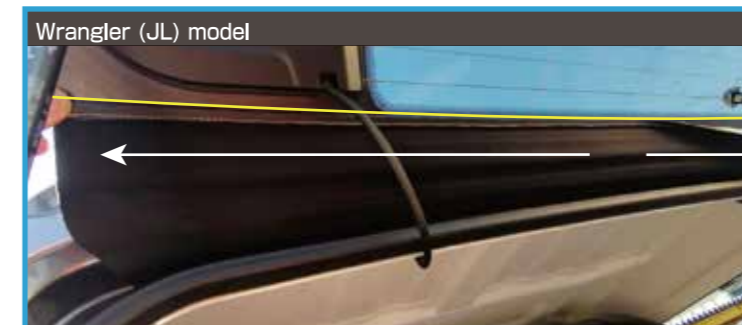

(4) After attaching the product, reinsert the weather strip removed in step (1) in its original position. (Figure 3)  
\* Push in deeply until secure.

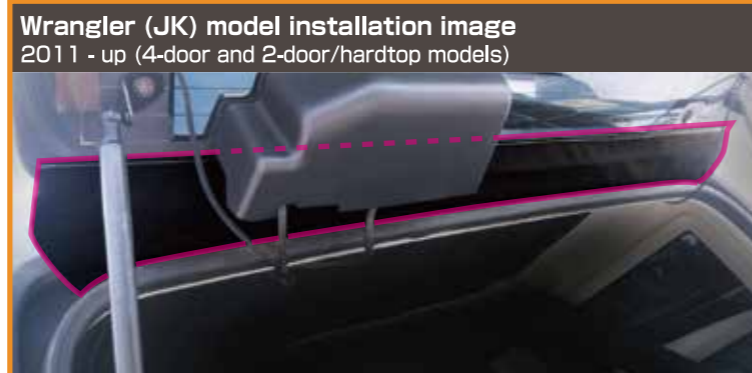

(5) Remove all of the (red) release paper for the double-sided tape on the stitching side of the product, and then temporarily secure the Wrangler (JL) and (JK) in place at the center of the ceramic line (yellow line) for both. (Figure 3)  
\* The installation surface varies depending on the model year of the vehicle. Refer to the images below.

(6) Temporarily fix the product in place at the center and install it along the yellow line, referring to step (5). (Figure 3)

**Installation position and method**

(1) Pull the weather strip at the top of the rear window towards you to remove it until the left and right corner joints are visible.

Wipe away any grime on the surface of the rear window or the grooves where the weather strip has been removed with a neutral detergent or similar cleaning solution, and then allow it to dry.
